

## Sectioning commands with critical notes

This file provides examples of using sectioning command with elemac. The section titles are in the line numbering, and have critical and side notes.

We use the \e1edxxx commands, each of them in their own \pstart...\pend group.

Page breaks are manually added before chapter with \beforee1edchapter.

# Chapter 1

## <sup>1</sup> chapter

chapter

<sup>2</sup> I use git to manage some packages. I would like to add a pre-commit hook,  
<sup>3</sup> to check if I have forgotten For now, I have a minimal pre-commit, which tests  
<sup>4</sup> only the blank spaces at ends of lines, but not the forgotten..

### <sup>5</sup> 1.1 section

section

#### <sup>6</sup> 1.1.1 subsection

subsection

##### <sup>7</sup> subsubsection

subsubsection

<sup>8</sup> I use git to manage some packages. I would like to add a pre-commit hook,  
<sup>9</sup> to check if I have forgotten For now, I have a minimal pre-commit, which tests  
<sup>10</sup> only the blank spaces at ends of lines, but not the forgotten.

### <sup>11</sup> 1.2 section

section

<sup>12</sup> I use git to manage some packages. I would like to add a pre-commit hook,  
<sup>13</sup> to check if I have forgotten For now, I have a minimal pre-commit, which tests  
<sup>14</sup> only the blank spaces at ends of lines, but not the forgotten.
