1 Introduction

In classical philology, it happens that ancient books are edited by modern scholar. So, when we refer to them, we have to not refer to the article, but, indeed, to the *book which is in the article*.

This package allows to create entry which's type is @bookinarticle, and which are printed like this:

Mémoire sur le saint apôtre Barnabé. In: Peter Van Deun. “Un mémoire anonyme sur saint Barnabé (BHG 226e). Édition et traduction.” In: *Analecta Bollandiana* 108 (1990), pp. 326–335

It also allows to create entry which's type is @bookinincollection, for book edited in a article of a collection.

Passio Sancti Titi Apostoli, Mense Ianurii die Quarto. In: Paolo Chiesa. “‘Non tibi proderit hec eruditio’. La versione latina degli *Acta greci* del discepolo Tito.” In: *Suave mari magno.... studi offerti dai colleghi udinesi a Ernesto Berti*. Ed. by Claudio Griggio and Fabio Vendruscolo. Udine: Forum Edizione, 2008, pp. 51–54
